EXPERIENCE

DLSC Software & Consulting GmbH

2005 – Present

Founder & Principal Engineer

Zurich, Switzerland

- Founded and runs a software company specialising in JavaFX UI controls, frameworks, and consulting.
- Authors and maintains FlexGanttFX (commercial Gantt/timeline framework for JavaFX), CalendarFX, FormsFX, GemsFX, and 8+ additional open-source libraries.
- Created and maintains JFXCentral — the community hub for JavaFX, built entirely in JavaFX and served via JPro.
- Provides freelance and consulting services; available for embedded team support, architecture reviews, custom JavaFX development, and mentoring.

Selected consulting clients: EIZO, Emirates, EBU, Accenture, Netcetera, Karakun, Qnamic, Projekt Pro GmbH, Sideline Sports, MINT Media, S4M, Alltrotec, AISO

Senapt Ltd

2018 – 2026

VP of Software Engineering

United Kingdom

- Led software engineering for an Energy-as-a-Service (EaaS) platform serving energy sellers and buyers in the UK market.
- Oversaw architecture and development of CRM and energy management systems.

Credit Suisse

2003 – 2004

Systems Lead Engineer, Assistant Vice President

Zurich, Switzerland

- Deputy manager of the department responsible for defining and implementing standards for Java development environments, tools, and application servers across Credit Suisse Financial Services (CSFS).
- Managed a team of approximately twelve employees.
- Architect and project team leader for the central build and deployment tool at CSFS, subsequently adopted by hundreds of Java developers.
- Standardised tooling across IDEs, CVS, Ant, JUnit, Clover, and application servers (BEA WebLogic, Tomcat).

Skyva International

1999 – 2003

Senior Software Engineer

Boston, MA, USA

- Developed rich Java client applications within an XML- and Java-based enterprise eBusiness platform.

Carnegie Mellon University – Robotics Institute

1996 – 1999

Senior Research Developer

Pittsburgh, PA, USA

- Worked in the Intelligent Coordination and Logistics Laboratory.
- Developed *Dirk's "J" Toolkit (DJT)* – a collection of custom UI components in 100% pure Java (AWT extension) used in the DITOPS/OZONE logistics planning system.

EDUCATION

University of Oldenburg

Graduated 1996

Diplom-Informatiker (M.Sc. equivalent) – Computer Science

Oldenburg, Germany

Gymnasium Sögel

1988

Abitur

Sögel, Lower Saxony, Germany
